

Parents,

I am showing the movie "Interstellar" next week. The movie relies on real science to present the special effects of blackholes, wormholes and changes that occur in space and time in the presence of a high gravity body. The movie is rated PG-13 due to some intense perilous action and brief strong language. It is UCS policy to have a permission form on any video that is not rate G. Please sign and return the form by Tuesday, June 2.

Thank You
R. Jacobs

_____ Yes, my son/daughter may watch the movie

_____ No, I do not want my son/ daughter to see this movie

Signature _____ Student _____
